

Speech title: "E = LC2 Energy of Love"

Jul 28,2019
Peter T. Fujiyama

OPENING

Thank you Toastmaster of the evening, good evening fellow members and welcome guests.

Do you know the genius who is well known for a photograph which shows a tongue out? Like this....

Yes, you're right. It's "Albert Einstein." He introduced the famous Theory of Relativity and awarded the Nobel Prize in 1921 (It was 98 years ago).

That is $E = mc^2$ (Energy = Mass 質量 x Cosmic Speed Square)

Tonight, I will NOT talk about the theory of relativity itself, but the new theory that is the most important one. Albert Einstein emphasized that is "Love." He introduced a formula: Energy = Love x Cosmic Speed, Love multiplied by the seed of light squared.

Before come up with my main point of "Energy of Love Formula", let me explain more about Einstein why the new formula finally came out.....

Body 1

- He was born, **140 years ago**, in 1879 in Germany.
- He was a Jewish and liked mathematics.
- At the **age 9**, he proved The Pythagorean Theorem.
- His IQ was high reportedly 180. My IQ is around 50. What about you?

- When he was **16 years old**, he did a thought experiment where he rode on one light wave and looked at another light wave parallel to him.
- When **37** years old (in 1916) He announced Theory of Relativity and received Nobel Prize in 1921 (**42**)
- In 1922 (he was **43**) He visited Japan with his wife, Elsa, in 1922 (97 years ago) on “Kitano Maru” by SS NYK to from France.
- He made his lecture of “Theory of Relativity” at Keio Univ. for 6 hours lecture with 2000 audience.
- After Hitler’s rise of power (**54** years old in 1933), he moved to the United States.

After my research and study, I found there are three interesting episodes:.

1st: In 1939 (80 years ago), Einstein sent a letter to US President Franklin Roosevelt to suggest to start its own nuclear program. Because German might develop atomic bombs, which eventually resulted in the “Manhattan Project.”

2nd : As the result, Japan had been devastated by the Atomic Bomb in 1945 that was a shocking disaster for Einstein because of his first commitment.

3rd: When he was around 70, he ultimately discovered a New Theory of Energy that will heal our planet and bring a peace and stability. The new theory is not published, but only passed to his daughter, Lieserl. What is it?

In 1980, Leserl donated 1,400 letters written by Einstein, to the Hebrew University, with orders not to publish their content until two decades after his death.

One of letters was: There is an extremely powerful force that, so far, science has not found a formal explanation to it.

BODY 2

This universe force is Love.

When scientists looked for a unified theory of the universe, they forgot the most powerful unseen force

1. Love is **light**: that enlightens those who give and received it
2. Love is **gravity**: because it make some people feel attracted to others
3. Love is **power**: because it multiples the best we have and allows humanity not to be extinguished in their blind selfishness.
4. **Love unfold and reveals.**
5. For Love **we live and die.**
6. Love is **God and God is Love.**

This force explains everything and gives meaning to life.

BODY 3

To give visibility to Love. Instead of $E=mc^2$, we accept that the energy to heal the word can be obtained from love multiplies by the speed of light squared, $E=Im^2$

We have arrived at the conclusion that the love is the most powerful force there is, **because it has no limit.**

- If we want our species to survive,
- if we are to find meaning in life,
- if we want to save the world and every sentient being what inhabit it. Love is the one and only answer.

- Perhaps we are not yet ready to make “a bomb of Love,” a device powerful enough to entirely destroy the hate, selfishness and greed that devastate the planet.

CONCLUSION

- If each individual carries within them a small but powerful generation of Love whose energy is waiting to be released.
- When we learn to give and received this universal energy, we will have affirmed that Love conquers all.
- Love is able to transcend everything and anything, because Love is **the quintessence of life.**

Albert Einstein has reached the ultimate answer

Toastmaster of the Evening.
